

# Easy Care Cashmere Sweater Collections

## **Description of products:**

In terms of raw materials, cashmere from goats in specific pastures, with good raw material uniformity, short fibre rate and less hairs. Also we use special dyeing technology, with imported dyeing additives, in low temperature dyeing process, which is to minimize fiber damage.

When spinning, also uses a unique craftsmanship with equipment imported from Italy, to keep the yarn twist and levelness are more uniform, which maintains the soft feel of the clothing, skin friendly and soft color characteristics and reduces the felting shrinkage of the fabric, realizing the function of soft machine washing of cashmere knitwear, and releasing the hands, so that the cashmere sweater can be soft machine washing, anti-felting and anti-fuzziness.

## **Washing attention:**

1. Reverse side washing;
2. Machine wash, Warm (not exceed 30°C);
3. Choose a soft program or cashmere/wool special program;
